Profile

I am searching for an opportunity to grow and demonstrate my skills as a developer. I consider myself a real go-getter. I'm 24 years old, I learn extremely quickly, I'm highly motivated and I put 110% effort into everything I do. I have been in the Printing and Graphics industry for 5 years, I never saw really making a career in that industry and I have always been fascinated by technology.

I saw the growing trends in the tech industry and I always loved working with technology. I've learned a lot in my early career. I strive for excellence and surround myself with positive people.

Stack Summary

Languages: JavaScript, CSS, HTML, NodeJS, Java, PHP

Client Frameworks: AngularJs, Angular 5 & 6, React, Bootstrap, Material UI, ReactJS, JQuery

Server Frameworks: Express, Node.JS

Automation Builds: NPM, yarn

Databases: SQL Server, working with simple Relational Databases

Others: VisualStudioCode, Redux, Flux, Sass

Experience

Contract work/freelance

2017-Current

I've been working as a freelance contractor, mainly UI for applications and webpages using JavaScript, React, CSS and HTML. I started working on friends websites then progressed to doing it full time.

Piedmont Graphics, Inc.

2014-2018

Started in Production while in school, I took over the estimating department for 2 years then started managing accounts. I had to learn basic database skills and java commands to operate the estimating software.

Education

Guilford Technical college/University of North Carolina Greensboro 2012-2016

Graduated with a degree in Business and Marketing.

Grimsley High school

2008-2012

Graduated with Honors, played Football & Golf, received scholarships for National Engineering Competition placed 1st in the state and top 10 in the United States – Skills USA
